**Immunization Declaration Form for Clinical Attachment**

**Clinical attachments (attaché)** include students and trainees undertaking training within the Royal Hospital. They can be either involved in direct patient care or administrative staff in healthcare settings such as computer technicians or medical records employees. They are required to ensure that their immunizations are up to date.

Perhaps the link between Healthcare workers (HCW) and patient safety is most clear in the area of infectious disease prevention. The hospital setting amplifies the spread of respiratory-borne pathogens, and protecting HCWs became the main defense against further spread to vulnerable patients and the community. In alignment with Royal Hospital mission and vision this policy is enforced to protect the patient from contacting infectious diseases from their carers and maintain HCW safety by ensuring their vaccination requirement are strictly followed.

**Staff involved in direct patient care:**

This includes staff who have regular clinical contact with patients and who are directly involved in patient care. This includes doctors, dentists, midwives and nurses, paramedics, laboratory personnel, ambulance drivers, occupational therapists, physiotherapists and radiographers. Students and trainees in these disciplines and volunteers who are working with patients must also be included. The form is also required for Grade School Level 0 – 12 students on-job shadowing.

**Non-clinical staff in healthcare settings:**

This includes non-clinical secondary staff that may have social contact with patients but are not directly involved in patient care. This group includes receptionists, IT technician, ward clerks, dietary, staff porters and cleaners.

The trainee must present a satisfactory evidence of protection against the below mentioned diseases which would include documentation of having received the vaccines or having had positive antibody tests.

**Important Notes:**

- For undergraduates / Hospital employees who are unable to present an evidence, a signature with stamp from the University or College / hospital / institution should be acquired declaring that the information in the form are deemed correct and will accept full responsibility of the attachment.
- For all volunteers dealing with patients including social interaction need to submit evidence of vaccination or positive serology for MMR/Varicella and annual influenza Vaccine

**All fields are mandatory. Any information that is not declared will result to immediate disapproval. Attach evidences of vaccination and serologies.**
